Marc LeMay, PhD

LEARNING EXPERIENCE DESIGNER

Tallahassee, FL · Remote 205-305-3458 marclemaydesign@gmail.com marclemaydesign.com LinkedIn

Twenty years of teaching, curriculum design, and program assessment in higher education, now building self-directed e-learning. Six courses built from scratch and years of asynchronous authoring in an enterprise LMS. Also a professional composer: every commission a project with a client, a budget, and a deadline.

SELECTED PROJECT

Conscious Discipline at Home — self-directed e-learning module

marclemaydesign.com/module-write-up · 2026

- A self-paced module teaching parents a de-escalation practice, with assessments inspired by real-life scenarios.
- Sole designer and developer: led research, information architecture, scenario writing, assessment design, UX and visual design, and built it in HTML, CSS, and JavaScript.
- Designed two scenario-based knowledge checks that each require several principles at once, with feedback in three bands and no scores or percentages.
- Built rules-based scoring that runs entirely on the learner's device, with a safety check ahead of scoring on every free-text answer.
- Tested accessibility by hand with VoiceOver on iPhone and Mac; ran a moderated think-aloud with a parent and rebuilt Learn from the findings; live in beta.

EXPERIENCE

Florida State University College of Music — Visiting Teaching Faculty; Adjunct Lecturer

2023–2026

- Sole designer of three undergraduate and two graduate music theory courses, authoring every assessment in Canvas across 50–60 students per semester.
- Translated dense theoretical scholarship into lecture decks for musicians who are not theorists, each built around a problem the audience wants solved.
- Rebuilt a graduate course for depth and critical thinking after the placement exam it remediated was eliminated.

Georgia State University School of Music — Faculty Lecturer; Director of Undergraduate Studies

2018–2022

- Directed undergraduate studies for roughly 350 students with 40 full-time and 25 part-time faculty, and chaired the committee responsible for undergraduate curriculum.
- Collected and reported assessment data across five course sections against scored criteria; the comparison identified a grader scoring consistently harder than peers, corrected the following year.
- Audited curricula against career-readiness competencies and reported where courses fell short, as one of four College of the Arts fellows on the university's Quality Enhancement Plan.
- Built and taught asynchronous courses in D2L Brightspace through the remote transition: recorded and captioned video lectures, authored quizzes and discussion boards, and monitored participation with engagement analytics.

Opera Philadelphia 2016: created content for a massive open online course accompanying an opera premiere, and delivered public lectures translating specialist material for general audiences.

Private instruction and adult education 2004–2018: designed individualized curricula for adult learners; created, marketed, and taught *Music Literacy for Music Lovers*, a non-credit course for voluntary adult learners.

SKILLS AND TOOLS

Design	Needs analysis · learning objectives · curriculum and course design · rubric and assessment design · rules-based scoring design · storyboarding · program-level assessment and reporting · accessibility accommodations and alternate formats
Tools	Rise 360 · Canvas · D2L Brightspace · Figma · Pro Tools · AI-assisted build and drafting (Claude, ChatGPT, Gemini)

EDUCATION

PhD, Music Composition, University of Pennsylvania, 2017 · **MA, Music Composition**, University of Michigan, 2010 · **BA, Music and Music Technology**, University of Alabama at Birmingham, 2007
